1100 E Apache Blvd,  
Tempe, AZ 85281

Dear Hiring Committee,

Please accept this cover letter and the attached resume as an indication of my sincere interest in the ASN Tutoring position with job ID 99804BR at Arizona State University. I was excited to find out about this position through a colleague in Fulton Ambassadors. I am a dedicated, punctual, and highly organized professional individual with previous experience. I would help promote the services further and would strive to provide excellent service to the students as and when required.

I am currently an incoming sophomore in Mechanical Engineering with a 4.29 GPA. With a strong background in math, physics, chemistry, and writing, coupled with additional skills, namely public speaking, collaboration, leadership and communication, I am confident of my ability to fit the responsibilities of this role. I also am the recipient of Dr James W. Turnbow Memorial Scholarship.

In my current leadership role as a Fulton Ambassador at ASU, I actively advocate for the Fulton Schools of Engineering at events and give campus tours to prospective students and their families. In doing so, I have furthered my speaking and communication skills and am better equipped to handle diverse groups of people, dedicating time to specific needs, and being answerable. I can also offer a wide range of resources and additional practice material for subjects I have undertaken previously.

I am interested in this position because of my past role of Teaching and Tutoring Assistant at Spring Dale Senior School. As a tutor, I have learned the importance of collaboration and cooperation. The prospect of being a tutor is appealing because it presents an opportunity to impact students' personal growth positively and engage with them personally. I am eager to leverage my skills and experiences to create an engaging and professional environment while contributing to students' overall success. I continue to help my peers academically outside of classes at ASU as well.

This position would not only allow me to help other students, but also help me grow holistically and professionally. It would enable me to better my verbal and written communication skills and equip me with an ability to understand problems and find unique ways to solve them, improving me as an engineer.

Thank you for your time and consideration. I will look forward to hearing from you soon and talking to you about my enthusiasm for the role. I can be reached at [asally2@asu.edu](mailto:asally2@asu.edu).

Sincerely,

Aditya Sally
